

# Corporate & University Relations Group

This website is currently under construction and is expected to go live in early October, 2021. In the mean time, please review the links below and direct any inquiries and comments to [Paul Jones](#).

Corporate & University Relations Group (CURG) and its senior associates are solely dedicated to providing systemic solutions for the emerging national effort to Transform Undergraduate Education in Engineering (TUEE). The proposed TUEE Collaboratory model [TUEE Comprehensive Pilot AY-2022-2023](#) is a systemic student-centered active learning model (curricular, co-curricular, diversity/inclusion and new standards for higher education/industry partnering) that is designed to facilitate widespread implementation of the [ASEE TUEE](#) findings and recommendations released in 2018. It is anticipated that two, possibly three, universities will implement scalable pilots of the TUEE Collaboratory comprehensive model throughout the 2022-2023 academic year.

Please note: The proposed [TUEE Collaboratory Two-Year Plan](#) is in the preliminary development stage by CURG and describes the process through implementation of the comprehensive pilot AY 2022-2023.

Paul Michael Jones

President, & CEO

**Corporate & University Relations Group**
